

S³ Soothing Skin Serum

What is S³ Soothing Skin Serum?

S³ Soothing Skin Serum is a gentle silicone-based serum designed to calm and protect damaged skin. Because the formulation is mild enough that it can even be applied to skin that has been scratched, burned, or otherwise irritated. Within minutes of application, the product will calm the skin and provide the protection the skin needs to start repairing itself. S³ Soothing Skin Serum contains two of the most skin-friendly, plant-derived oils available, squalane and jojoba oil. By combining these oils with a silicone fluid base and then adding Therametics' patent pending complex Therosol®II, S³ Soothing Skin Serum is the perfect choice for soothing and calming red and damaged skin. The product is non-irritating and so gentle that it can be applied as often as necessary. The formulation absorbs very quickly into the skin and will not remain on the surface to stick to clothing. The Therosol®II complex consists of two pure botanically derived ingredients, which work together to reduce the appearance of redness and calm distressed skin.

What are some of the ingredients in S³ Soothing Skin Serum?

Cyclomethicone, Dimethiconol, Cyclopentasiloxane, and Dimethicone

- This is a proprietary blend of four skin-friendly silicones that produce a greaseless, fast-absorbing gentle feel when applied to the skin. Because of their non-water nature, they can quickly penetrate into the top-most layer of the skin (stratum corneum), where they help to produce a barrier against water loss thus allowing the skin to retain moisture. This silicone blend is non-irritating and non-comedogenic.

Jojoba Oil

- This oil is prepared from the seed of the jojoba plant and unlike many natural oils, is chemically very similar to the oil produced by sebaceous glands in the skin. It is a superior moisturizing emollient, which helps soften and smooth skin. It is so gentle and pure that jojoba oil can be applied to cracked and damaged skin to help moisturize and restore the skin's barrier.

Squalane

- Squalane can be obtained from an animal source (shark) or from a plant source (olives). Therametics' products ONLY contain squalane from olive oil. This unique oil boosts the skin's ability to hydrate and is a superior emollient. It is very similar to oils produced in the skin and is therefore an excellent choice to use in order to help repair damaged skin.

Therosol®II Complex

- Therosol®II Complex is a proprietary and patent-pending blend of two botanically derived ingredients developed by Therametics' scientists. Research studies have shown that Therosol®II complex has been shown to increase collagen and elastin production and reduce inflammatory hormones in human skin cells. When blended with a silicone base Therosol®II is effective in soothing damaged skin.

How do I use S³ Soothing Skin Serum?

After cleansing skin with Therametics' Foaming Facial Cleanser, apply S³ evenly and liberally to all affected areas of the skin. Because of its calming and moisturizing properties as well as its fast-absorbing properties, Soothing Skin Serum can be applied as frequently as necessary to affected skin. For best results it should be used at least twice a day until the skin has returned to normal. This product is gentle enough that it can be used on skin that has been damaged by psoriasis, eczema, burns, bug bites and rashes.

Are there any concerns regarding the use of S³ Soothing Skin Serum?

There are no known concerns regarding the use of this product. However, as with any skin care product, you should avoid getting the S³ Soothing Skin Serum in the eyes, and if irritation develops discontinue use.
